ABOUT ME

I am a Computer Engineer with a strong foundation in C, C++, and C#. I am experienced in Unity game development, Arduino/ESP32 IoT projects, and full-stack web technologies including HTML, CSS, and MySQL.

EDUCATION

Computer Engineering
Dumlupinar University / Kütahya
4th grade gpa: 2.95
2021 - 2026

SPECIALIZATION

- Front end web dev (CSS, HTML, MySQL)
- Arduino, ESP32 (Smart Home applications)
- Unity game development (C#)
- 3D design (3ds Max, Coohom)

SKILLS

- Programming Languages:**
C, C++, C#, Java, JavaScript, Arduino.
- Databases:**
MySQL, MSSQL, Oracle SQL.
- Tools & Platforms:**
Git, GitHub, Visual Studio, Unity.

LANGUAGES

TURKISH	ENGLISH	ARABIC
Native	advanced	Native

WORK EXPERIENCE

3D Designer Solo 2022 - 2023
[Full-Time]

LISA TEXTILES | Bursa, Türkiye

I designed realistic interior 3D scenes focused on curtain and upholstery fabric presentations, creating detailed room visualizations and fabric renderings for product showcasing and client presentations.

E-commerce Content & Product Data Specialist x2 2024 - 2025
[Full-Time]

LISA TEXTILES | Bursa, Türkiye

Managed and maintained e-commerce product listings by entering and updating product data such as descriptions, available color options and codes, pricing, and product images. Used Hostinger content management system to organize and update online store content, ensuring accuracy, consistency, and up-to-date product information across the platform.

ACADEMIC PROJECTS

2D Game Development (Unity, C#) Solo 2023 - 2024

Developed a Mario-style 2D platformer game using Unity and C#. Implemented core gameplay mechanics including character movement and collision systems, and integrated game visuals and assets. Completed individually.

IoT Smart Home System (Arduino, ESP32) Solo 2024 - 2025

Developed a smart home IoT system using an ESP32 with Arduino. The system retrieves real-time weather data via Wi-Fi and triggers automated responses based on environmental conditions. Implemented a web dashboard for live monitoring using ESP32 WebServer.

Car Rental System (MySQL, C#) x2 2024 - 2025

Developed a car rental system using MySQL and C#. Designed the database structure and built a desktop interface to manage vehicles, customers, and rental operations.

UI & Visual Effects | Piano Tiles Web Game (HTML, CSS, JS) x4 2024 - 2025

Contributed to a Piano Tiles-style web game by developing user interface elements and visual effects. Focused on interactive UI design, animations, and responsive visual feedback to enhance gameplay experience. Worked collaboratively on integrating visuals with game functionality and improving overall user experience.

Team Leader | Unity Game Development (PC & Mobile, C#) x5 2025 - 2026

Led a team in the development of two Unity-based games (PC and Android). Designed and implemented the main map system, scene transitions, vehicle entry/exit mechanics, collision system, and taxi mission gameplay logic. Acted as the primary technical reference for gameplay systems and supported team members in development and debugging. The projects achieved top ranking in class consecutively for two academic submissions.

Frontend Developer | HızlıTarif Recipe Website (HTML, CSS, JS) x2 2025 - 2026

Developed the frontend of HızlıTarif, a modern recipe web application that helps users discover recipes based on ingredients, cuisine, preparation time, and dietary preferences. Built a responsive and user-friendly interface using HTML, CSS, and JavaScript, focusing on dynamic UI components, usability, and multilingual support. Collaborated with backend developers to integrate APIs and ensure smooth data flow across the platform.
